Solar energy is the most effective of all energy resources and it can even be available in cloudy weather. The solar energy which comes to the Earth is about 10,000 times greater than the amount which humankind consumes. Solar technologies can deliver heat, cooling, natural lighting, electricity, and fuels. Solar technologies convert sunlight into electricity energy through solar panels or mirrors. Although not all countries use solar energy, it is possible for every country.

The cost of producing solar panels has surprisingly decreased in the last few years, making them not only in access but often the cheapest form of electricity. Depending on the type of material used in their production, solar panel can work for around 30 years.

A good dictionary can be an invaluable tool for the independent learner. It can answer your specific vocabulary question on demand. (تقاضا — خواسته) But there are two important things that you must remember. First it needs to be the right dictionary for your needs; Second you need to be aware (آگاه) of all the different types of information it contains. But the most important things that I believe, you must be sure how to make the best use of it.

A good dictionary is not a list of isolated (به تنهایی — تنها) words with their meanings or translation. It is said that a word in isolation (به تنهایی) has no limited meaning. The word only becomes meaningful when it is placed in context. The job of a dictionary is to place a word in each of its possible contexts and explains its meaning in each case.
